

Reporting and Compliance

WITH REZILION'S SOFTWARE ATTACK SURFACE MANAGEMENT PLATFORM you can automate the definition, enforcement, and reporting of security policies and SLA compliance. Continuous updates ensure transparency for customers and auditors and secure the software you deliver to customers.

Why Use Rezilion

1. **Define** and automatically enforce policies from CI to production
2. **Continuous** and automated compliance
3. **Drive** transparency for customers and auditors using a Dynamic SBOM and exportable reports
4. **Continuously monitor**, track, and resolve any violations

Key Features

- ✓ **Centralized** view of your security policies
- ✓ **Ensure** full-cycle security compliance
- ✓ **Always** know your true attack surface
- ✓ **Fulfill** your software transparency obligations
- ✓ **Track** and monitor policies and SLAs

How the Platform Works

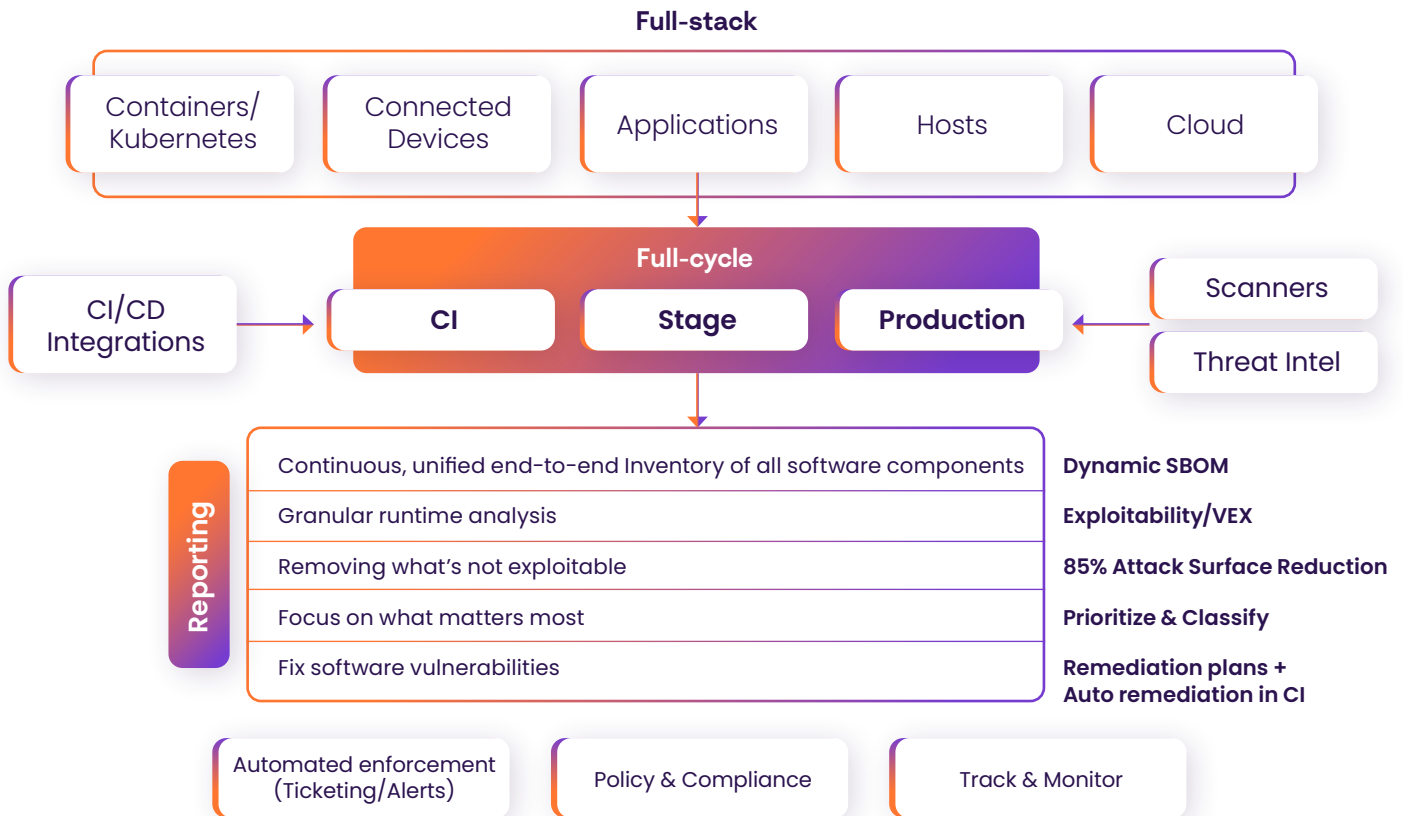

Rezilion platform secures your software in three easy steps:

- ✓ **Discover:** Rezilion's Dynamic SBOM discovers and identifies all software components on any layer of the software stack and at any stage of the Software Development Life Cycle (SDLC).
- ✓ **Prioritize:** Using continuous granular runtime analysis the platform detects vulnerable software components and determines their exploitability- filtering out 85% of vulnerabilities.
- ✓ **Remediate:** Rezilion then automatically mitigates exploitable vulnerabilities across the SDLC from CI to production, reducing vulnerability backlogs and remediation timelines from months to hours.

With this holistic software attack surface management approach Rezilion customers can:

- ✓ **Save** countless hours they would otherwise spend on fixing all of the vulnerabilities including ones that do not pose a risk
- ✓ **Shorten** attack windows
- ✓ **Give** DevOps teams time back to build
- ✓ **Improve** their time to market by releasing products quickly and securely

Rezilion's Software Attack Surface Management Platform

Jobs to be Done

1. **Define**, align, and enforce security policies across CI, Stage, and Production. Set, customize, and ensure compliance to meet acceptable risk thresholds.
2. **Measure** and report on my real attack surface in real-time with Rezilion's Dynamic SBOM.
3. **Quickly** and easily track and monitor policy violations and SLAs by app, data center, or BU with workflow integration and automation.
4. **Automatically** alert and communicate on resolved issues.
5. **Easily share** SBOMs with auditors, procurement officers, and customers to address procurement, security, and audits needs.

About Rezilion

Rezilion's platform automatically secures the software you deliver to customers. Rezilion's continuous runtime analysis detects vulnerable software components on any layer of the software stack and determines their exploitability, filtering out up to 95% of identified vulnerabilities. Rezilion then automatically mitigates exploitable vulnerabilities across the SDLC, reducing vulnerability backlogs and remediation timelines from months to hours, while giving DevOps teams time back to build.
