

Reporting and Compliance

WITH REZILION'S SOFTWARE SUPPLY CHAIN SECURITY PLATFORM, you can automate the definition, enforcement, and reporting of security policies and SLA compliance. Continuous updates ensure transparency for customers and auditors and secure the software you deliver to customers.

Why Use Rezilion

1. **Define** and automatically enforce policies from CI to production
2. **Continuous** and automated compliance
3. **Drive** transparency for customers and auditors using a Dynamic SBOM and exportable reports
4. **Continuously monitor**, track, and resolve any violations

Key Features

- ✓ **Centralized** view of your security policies
- ✓ **Ensure** full-cycle security compliance
- ✓ **Always** know your true attack surface
- ✓ **Fulfill** your software transparency obligations
- ✓ **Track** and monitor policies and SLAs

How the Platform Works

Rezilion platform secures your software in four easy steps:

- ✓ **Discover:** Create an instant inventory of all the software components in your environment with Rezilion's SCA and Dynamic SBOM
- ✓ **Aggregate:** Enrich and consolidate scan results from multiple tools in a single dashboard for a complete view of your software attack surface
- ✓ **Prioritize:** Using continuous granular runtime analysis the platform detects vulnerable software components and determines their exploitability – filtering out vulnerabilities that pose no risk (up to 85%)
- ✓ **Remediate:** Cluster vulnerabilities to eliminate multiple problems at once and automatically execute remediation work to save teams time

With this holistic software attack surface management approach Rezilion customers can:

- ✓ **Easily** aggregate all their third-party and open-source software risk
- ✓ **Save** countless hours they would otherwise spend on fixing all of the vulnerabilities, including ones that do not pose a risk
- ✓ **Shorten** attack windows
- ✓ **Manage** supply chain risks from a single, centralized control panel
- ✓ **Give** DevOps teams time back to build
- ✓ **Improve** their time-to-market by releasing products quickly and securely

Rezilion's Software Supply Chain Security Platform

Jobs to be Done

1. **Define**, align, and enforce security policies across CI, Stage, and Production. Set, customize, and ensure compliance to meet acceptable risk thresholds.
2. **Measure** and report on my real attack surface in real-time with Rezilion's Dynamic SBOM.
3. **Quickly** and easily track and monitor policy violations and SLAs by app, data center, or BU with workflow integration and automation.
4. **Automatically** alert and communicate on resolved issues.
5. **Easily share** SBOMs with auditors, procurement officers, and customers to address procurement, security, and audits needs.

About Rezilion

Rezilion's software supply chain security platform automatically assures that the software you use and deliver is free of risk. Rezilion detects third-party software components on any layer of the software stack and understands the actual risk they carry, filtering out up to 95% of identified vulnerabilities. Rezilion then automatically mitigates exploitable risk across the SDLC, reducing vulnerability backlogs and remediation timelines from months to hours, while giving DevOps teams time back to build.
